

Understanding Asthma & COPD

This seminar is realistic, unique and empowering! You will learn how to avoid these common illnesses or how to take control of it if you already have it. Everyday that you live with a chronic illness you maybe losing precious days from your life if you don't fully understand what's happening to your body. Most common illnesses have no obvious signs or symptoms until they have already done significant damage. And some people have the attitude, "if it ain't broke, don't fix it." But the fact is that "it" may be "breaking" and we just don't know it yet.

Learning about these common lung illnesses can empower you to take control and avoid any unnecessary suffering they could bring. The simple steps you need to take are right at your fingertips. Let me show you how!
