

Learning How to Take Prescription Medication Safely

This seminar is realistic, unique and empowering! You will gain clarity regarding the process of taking prescription medication so that you can reap the benefits and avoid potential harm.

Seminar Objectives:

In this seminar, you will learn how to:

- ✓ Get an understanding about common medication issues such as redundant medication and learn the difference between a drug allergy and drug intolerance
- ✓ Learn the most important basic information about common medication
- ✓ Learn what critical question to ask your health care provider before starting a new prescription medication
- ✓ Learn how to manage your medication, including picking the right pharmacy, when to request refills, etc.
- ✓ Discover insider secrets for saving money on your prescriptions
- ✓ Learn about drug assistance programs
- ✓ And much more!

All material is presented in a simple format that doesn't overwhelm you with unnecessary information or medical jargon.

Who Should Attend:

- People who take prescription medication
- Caregivers who provide care to a loved one who takes prescription medication
- Any health conscious person

Seminar Details:

- This dynamic seminar typically runs 45 minutes to one hour.
- Each attendee will be provided a handout to follow along and to take notes.
- The presentation will be made using screen projected PowerPoint.
