

How to Stay Safe if You're Hospitalized

This seminar is realistic, unique and empowering! You will get the inside scoop on navigating your way through a hospital stay.

Being in the hospital can be your saving grace. But it can also be confusing, frightening, depressing and dangerous. A common myth is that hospitals are completely safe places, but the truth is, they're not completely safe. This seminar is one of the best ways to improve your safety or the safety of a loved one while hospitalized.

Seminar Objectives:

In this seminar, you will learn how to:

- ✓ Learn how to prepare for a hospital stay
- ✓ Discover your rights as a hospital patient
- ✓ Receive an overview of the different parts of most hospitals
- ✓ Be given the seven insider secrets to surviving a hospital stay
- ✓ And much more!

All material is presented in a simple format that doesn't overwhelm you with unnecessary information or medical jargon.

Who Should Attend:

- Anyone preparing to be hospitalized
- Caregivers who provide care to a loved one who may be hospitalized frequently
- Any health conscious person

Seminar Details:

- This dynamic seminar typically runs 45 minutes to one hour.
- Each attendee will be provided a handout to follow along and to take notes.
- The presentation will be made using screen projected PowerPoint.
